Use Case Name:	Signing-In & Out
Description:	User can navigate from the website main page to the login page, and from there, can sign-in and/or sign-out using their Google account.

Users:	Movie Fans
Pre-conditions:	User is at the website main page for GoodReels (found at http://goodreels.github.io/)
Post-conditions:	User has successfully signed-in, and summarily signed-out of GoodReels using their Google account.
Frequency of Use:	Whenever a user wishes to use the site as a specific individual with an associated user account.*

Flow of Events:	**Actor Action**	**System Response**	**Comments**
	1. Click the "Login" link under the page's header picture.	Website will load the login page consisting of a "Sign in with Google" button, a "Sign out" link, and a "Main" link.	
	2a. Click "Sign in with Google" at the top of the page	A smaller window may appear that is generated by Google. Otherwise, button will now say "Signed in with Google."	
	2b. *If* Google window appears, follow its prompts and click "Allow".	Google window will close and button will now say "Signed in with Google."	
	3. To sign out, click the "Sign out" link beneath the button that says "Signed in with Google."	The button should now say "Sign in with Google," as it did before.	

Test Pass?:	Pass / Fail
